Kenneth I. Rose, III, Financial Analyst (3HS62)
U.S. Environmental Protection Agency, Region III
1650 Arch Street
Philadelphia, PA 19103-2029

Dear Mr. Rose:

Attached please find our response to EPA's 104e information request related to the Metro Container Superfund site in Trainer, Pennsylvania. We have gathered available documents related to the site and interviewed appropriate personnel to prepare this response.

We appreciate the extension granted by EPA which allowed for additional time to obtain offsite records and conduct a thorough review.

If you should have any questions regarding our response, please don't hesitate to contact me at 713-439-8789.

Sincerely,

Dina Kuykendall
Director of Environmental Affairs
Baker Hughes

Jeff Shank, Deputy General Counsel

EPA Information Request for Metro Container Corporation**Baker Petrolite Corporation Response****30 May, 2012**

EPA's investigation of the Metro Container Site (Site) has reported the presence of hazardous substances in drums found at the Site including, but not limited to, volatile organic compounds such as benzene, tetrachloroethylene, toluene, and trichloroethylene; polycyclic aromatic hydrocarbons such as anthracene, benzo(a)anthracene, benzo(a)pyrene, benzo(a)fluoranthene, benzo(g,h,i)perylene, benzo(a)fluoranthene, and chrysene; PCBs such as Aroclor-1248, Aroclor-1254, and Aroclor-1260; and metals such as antimony, arsenic, cadmium, lead, mercury, nickel, thallium, and zinc.

Overview: Petrolite Corporation began operating the Eddystone facility in June of 1982. In January of 1984, a price quotation was received from Metro Container for the reconditioning of empty steel drums. Records indicate empty drums were sold to Metro Container from 1984 to 1986. The Eddystone facility identified below did not produce any products or materials. It was used as a distribution center for company products. Some empty drums as defined by the applicable RCRA regulations were located at the facility from time to time when products were transferred from totes to drums or drums were returned from a customer location.

Baker Petrolite Corporation's response to each EPA request is based upon the foregoing with the specific responses shown below:

1. EPA has information which indicates that you sent drums to the Metro Container Site between 1980-1988 from one or more of your facilities. For each such facility, identify:

a) the address of the facility

- ***Baker Petrolite Corporation (formerly Petrolite Corporation)
301 Saville Avenue, (4th & Saville Avenue)
Eddystone, Pennsylvania 19022-1526***

b) the products/materials produced at such facility between 1980-1988.

- ***As mentioned, the facility did not produce (i.e., manufacture) any products. Specialty chemical products used for industrial applications were stored at the site. We have no records of the specific products stored at this facility during the timeframe of 1980-1988.***

2. Identify the processes used between 1980-1988 to produce the products/materials identified in response to Question #1.

- ***Not Applicable. Products were not produced at the facility, only stored at the site for distribution.***

3. Identify the raw materials used in the processes identified in response to Question #2.

- *Not applicable.*

4. Identify all wastes and by-products generated between 1980-1988 from the processes identified in response to Question #2.

- *Some empty drums were generated periodically as a result of the transfer of chemicals from drums to totes. Occasionally, empty drums were returned to the facility from customer locations. We have no other records of waste produced from the site from 1980-1988.*

5. For each raw material and waste/by-product identified in response to Questions #3 and #4:

a) Identify the chemical composition.

- *Not applicable.*

b) Provide a copy of all documents referring to or related to the composition of such raw material and waste/by-product including, but not limited to, chemical analyses performed on such raw materials and wastes/by-products; and

- *Not applicable.*

c) Identify how each waste/by-product was disposed of between 1980 and 1988.

- *Empty drums were recycled through a drum reconditioning operation if reusable, or sent for offsite disposal if not suitable for reuse. As per the previous response to EPA in 1988, (see Enclosure A) drums were inspected to ensure they were indeed empty according to RCRA requirements.*

6. Identify all chemicals/constituents that would have been present in drums present at any time between 1980-1988 at the facilities identified in response to Question #1(a).

- *Specialty chemicals for industrial applications. No other more specific information is available.*

7. Identify the number of drums/containers sent to the Metro Container Site from the facilities identified in response to Question #1;

- *Manifests provided in our 1988 response to EPA indicates that 3356 drums were shipped to the Site. See Enclosure B for shipping and remittance documents. Please note that some documents (e.g., Bills of Lading, delivery receipt and remittance advice) refer to the same shipment.*

8. Identify the procedures used to determine which drums present at any time at your facilities would be sent to the Metro Container Site.

- *A pricing quotation from Metro Container Corporation provides that Metro Container would buy empty steel drums from Petrolite Corporation that were suitable for reuse. Accordingly, those drums deemed empty in accordance with then applicable RCRA requirements and in good condition would then be sold to Metro Container in accordance with the terms of the quotation.*
- *Per the affidavit dated May 12th, 1988 (see page 3 of Enclosure A), each drum was inspected to determine if the empty drum was truly empty per RCRA requirements. "In those few cases in which a drum was rejected as being non-empty, the non-empty drum was further drained and then resubmitted to and accepted by Metro Container Corporation."*

9. Identify the chemicals/constituents contained in the drums you sent to the Metro Container Site.

- *Only RCRA empty drums were shipped to Metro Container, which would have contained minimal residues (i.e., no free liquids and less than 1" of residue).*

10. If you assert in response to Question #9 that some or all of the drums sent to the Metro Container Site were empty, identify the chemicals/constituents that would have been in the drums before they were emptied.

- *Specialty chemicals for industrial applications. No other more specific information is available. However, one shipping document indicates that a quantity of 63 drums shipped on August 2, 1984 previously contained a Corrosive Liquid NOS UN 1760 by DOT classification. See Enclosure C.*

11. Identify, and provide a copy of, all contracts and agreements between you and Metro Container Corporation or any related entity under which drums were sent from your facilities to the Metro Container Site.

- *See Enclosure D for pricing quotation from Metro Container Corporation.*

12. Provide the name, title, address, and telephone number of the person answering these questions on your behalf. For each question, provide the name, title, area of responsibility, current address, and telephone number of all persons consulted in preparation of the answers.

Responses prepared by:

Dina Kuykendall, Director of Environmental Affairs 1-713-439-8789

Baker Hughes

2929 Allen Parkway, Suite 2100, Houston, TX 77019

Persons consulted regarding this information request included the following:

13. If any of the documents solicited in this information request are no longer available, please indicate the reason why they are no longer available. If the records were destroyed, provide us with the following:

a. Your document retention policy;

- ***Our current document retention policy is attached (Enclosure E) which indicates non-hazardous waste records for items such as RCRA empty drums are to be retained for 5 years.***

b. A description of how the records were/are destroyed (burned, archived, trashed, etc.);

- ***Specific information on the exact means of destruction is not available, but shredding or disposal in the normal course of waste removal were acceptable practices.***

- c. The approximate date of destruction; *Information not available.*
- d. A description of information that would have been contained in the documents; *Information not available.*
- e. The name, job title, and most current address known to you of the person(s) who would have produced these documents; the person(s) who would have been responsible for the retention of these documents; and the person(s) who would have been responsible for the destruction of these documents. *Information not available.*

14. If you have any information about other parties who may have information which may assist the EPA in its investigation of the Site or who may be responsible for the generation of, transportation to, or release of contamination at the Site, please provide such information. The information that you provide in a response to this request should include the party's name, address, type of business, and the reasons why you believe that the party may have contributed to the contamination at the Site or may have information regarding the Site.

- *The site was formerly operated by Monroe Chemical Company and Dcida during the timeframe between 1980 and 1988. We have provided documentation of this ownership. Please refer to the Real Estate and Tax Records Folio Inquiry provided as Enclosure F.*
- *We have no additional information to contribute to EPA.*

Mr. Lawrence Falkin
U.S. Environmental Protection Agency, Region III
CERCLA Removal Enforcement Section (3HW14)
841 Chestnut Building, 6th Floor
Philadelphia, PA 19107

Re: Metro Container Corporation Site

Dear Mr. Falkin:

This letter is in response to the letter of your
Bruce P. Smith, dated April 12, 1988 and addressed to our
Eddystone, Pennsylvania plant.

Please find attached to this letter the Affidavit of
Mr. Ronald R. Stephenson which indicates that only empty
drums were sold or otherwise delivered to Metro Container
Corporation.

Also attached are copies of all documents (38 pages) we have
been able to find after diligent search of our files
pertaining to Metro Container Corporation. These documents
include delivery tickets, checks received, bills of lading
and Metro Container purchase memos and one letter.

Other than the commercial relationship represented by the
above documents, Petrolite Corporation has no other
relationship with Metro Container Corporation or their
Trainer, Pennsylvania site.

Petrolite Corporation is a medium-sized manufacturer of
highly specialized chemicals for use in oil and gas
production and transportation, for cooling water and
wastewater treating, and for other industrial uses. This is
a highly competitive and very limited business. In light of
this and other factors stated below, and pursuant to 40 CFR
Part 2, Subpart B, Petrolite Corporation claims the documents
attached, except bills of lading to be confidential business
information ("information"), and have so marked them.
Disclosure of the drum pricing information and the nature of
its business relationship with Metro Container Corporation
would cause harm to Petrolite Corporation.

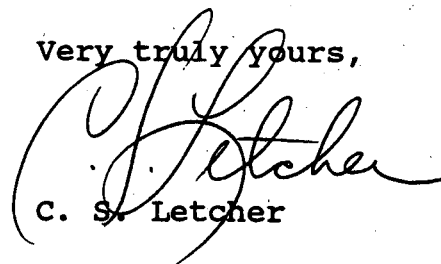

Mr. Lawrence Falkin
U.S. Environmental Protection Agency, Region III
CERCLA Removal Enforcement Section (3HW14)
May 23, 1988
Page 2

Petrolite Corporation does not disclose the details of its business relationships with others, including the price paid or received for any product. Petrolite Corporation has taken measures to protect the confidentiality of this information and it intends to continue to take such measures. This information is not, and has not been reasonably obtainable without Petrolite Corporation's consent by other persons (other than governmental bodies) by use of legitimate means (other than discovery based on showing of special need in a judicial or quasi-judicial proceeding). The information is not publicly available elsewhere and no statute specifically requires disclosure of the information.

Petrolite believes that its Confidential Business Information substantiation is complete and sufficient to substantiate its claims. However, if EPA feels there are deficiencies in its substantiation, Petrolite requests the opportunity to augment its claims accordingly before the EPA makes a finding that certain confidential business information can be released.

Should you have further questions of Petrolite Corporation, please contact me at the above address.

Very truly yours,

C. S. Letcher

I, Ronald R. Stephenson, of legal age and after being duly sworn on oath state as follows:

1. The facts stated herein are within the affiants' personal knowledge.
2. Affiant is currently the Manager of Petrolite Corporation's plant located at 4th and Sayville, Eddystone, Pennsylvania and has been employed at said location in several capacities since said plant opened in June, 1982.
3. That from time to time during the period from January, 1984 to April, 1986, Petrolite Corporation sold or otherwise delivered only empty (as defined by the regulations implementing the Resource Conservation and Recovery Act, 40 CFR 261.7(b)(1)) drums to Metro Container Corporation of Trainer, Pennsylvania, except as noted below.
4. That at all times of which I am aware, no matter whether Petrolite Corporation delivered empty drums to Metro Container Corporation or Metro Container Corporation picked-up empty drums from Petrolite's Eddystone plant, each drum was inspected by Metro Container personnel to determine if the empty drum was truly empty. In those few cases in which a drum was rejected as being non-empty, the non-empty drum was further drained and then resubmitted to and accepted by Metro Container Corporation.

Further you affiant saith not.

Ronald R. Stephenson

the property described below, in apparent good order, except as noted (contents and condition of contents of packages unknown), marked, consigned, and destined as indicated below, which said carrier (the word carrier being understood throughout this contract as meaning any person or corporation in possession of the property under the contract) agrees to carry to its usual place of delivery at said destination, if on its own route otherwise to deliver to another carrier on the route to said destination. It is mutually agreed, as to each carrier of all or any of said property over all or any portion of said route to destination, and as to each party at any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions of the Uniform Domestic Straight Bill of Lading set forth (1) in Official, Southern, Western and Illinois Freight Classifications in effect on the date hereof, if this is a rail or a rail-water shipment, or (2) in the applicable motor carrier classification or tariff if this is a motor carrier shipment. Shipper hereby certifies that he is familiar with all the terms and conditions of the said bill of lading, including those on the back thereof, set forth in the classification or tariff which governs the transportation of this shipment, and the said terms and conditions are hereby agreed to by the shipper and accepted for himself and his assigns.

the property described below, in apparent good order, except as noted (contents and condition of contents of packages unknown), marked, consigned, and destined as indicated below, which said carrier (the word "carrier" being understood throughout this contract as meaning any person or corporation in possession of the property under the contract) agrees to carry to its usual place of delivery at said destination, if on its own route otherwise to deliver to another carrier on the route to said destination. It is mutually agreed, as to each carrier of all or any of said property over all or any portion of said route to destination, and as to each party at all time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions of the Uniform Domestic Straight Bill of Lading set forth (1) in Official, Southern, Western and Illinois Freight Classifications in effect on the date hereof, if this is a rail or a rail-water shipment, or (2) in the applicable motor carrier classification or tariff if this is a motor carrier shipment.

Shipper hereby certifies that he is familiar with all the terms and conditions of the said bill of lading, including those on the back thereof, set forth in the classification or tariff which governs the transportation of this shipment, and the said terms and conditions are hereby agreed to by the shipper and accepted for himself and his assigns.

January 17, 1984

CONFIDENTIAL

Mr. Jim Ritchie
Petro-lite Corp.
4th & Saville Ave.
Eddystone, Pa. 19013

Dear Jim:

With reference to my visit to your office on January 12, 1984, I wish to confirm the prices furnished to you at that time.

We can offer you \$4.50 each for your empty 55 gallon D.O.T. 17-E unlined type used drums delivered to our Trainer, Pa. location. For drums with lined interior we can offer \$2.50 each delivered. If we find that we can remove the interior lining during the reconditioning process, we will adjust the lined drum price to \$3.50 each.

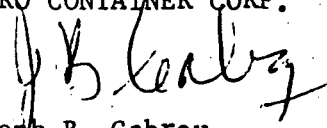

Should you prefer our trucks to pick up your drums at your Eddystone Plant, deduct .50¢ from the above prices.

In addition, we will completely recondition any of your drums which you require to reuse for \$6.00 each F.O.B. our Plant.

I would like to have you visit our Plant and see our facilities. I will contact you in the near future and try to arrange a date convenient to you.

Very truly yours,

METRO CONTAINER CORP.

Joseph B. Cabrey
